# B.Sc. DEGREE (C.B.C.S.) EXAMINATION, JUNE 2018

## Second Semester

Core Course—CS2 CRT 04—COMPUTER ORGANIZATION AND ARCHITECTURE

(Common to Computer Science M III, IT and B.C.A. Programmes)

[2017 Admissions only]

Time: Three Hours

Maximum: 80 Marks

#### Part A

Answer any ten questions. Each question carries 2 marks.

- 1. What is the significance of addressing mode? Explain any one addressing mode.
- 2. Explain different instruction code formats.
- 3. What is hit ratio?
- 4. Explain the fetch cycle.
- 5. What is a status register? Explain the status bits.
- 6. What is a super computer?
- 7. Define interrupt. List the types of interrupts.
- 8. What is control word?
- 9. What is SISD?
- 10. What is an accumulator?
- 11. Explain multiprocessing system.
- 12. What is a One-Address instruction? List any two One-Address instructions.

 $(10 \times 2 = 20 \text{ marks})$ 

#### Part B

Answer any six questions. Each question carries 5 marks.

- 13. Explain different instruction code formats.
- 14. Explain how the reverse polish notation is suitable for stack manipulation.
- 15. With the help of a diagram explain Set-Associative Mapping.

Turn over

- 16. What are data transfer instructions? List the data transfer instructions.
- 17. Explain microprogrammed Control Unit.
- 18. Explain vector processing.
- 19. Explain the memory hierarchy in a Computer system.
- 20. What is an array processor? Explain SIMD array processor.
- 21. Give an account of Virtual Memory.

 $(6 \times 5 = 30 \text{ marks})$ 

### Part C

Answer any **two** questions. Each question carries 15 marks.

- 22. Describe the instruction cycle in detail.
- 23. Explain the stack organization in CPU.
- 24. What is pipelining? Explain arithmetic, instruction and RISC pipeline.
- 25. Explain the various addressing modes with the help of example.

 $(2 \times 15 = 30 \text{ marks})$
